free xchange of newspapers, periodicity, was greatly increased.

It was supposed that the reduced rates of postage in printed matter recommended in my report would diminish the revenue from that source also t two hundred thousand dollars per annum. The rates adopted, with the free circulation of weedy newspapers within the countries where published, and the very great extension of the privilege of free exchange between publishes, will it is believed, diminish the revenue at least fix hundred thousand dollars per annum, unless the maintry of such matter be increased more that is now anticipated.

2 otwithstanding this diminuition beyond that which would have resulted from the adoption of the rates recommended, no change in the precent rates of letter postage is decided advisable. In appears that an actual increase of 18.65 per cent, occurred during the past ibseal year in Amer-ican Postages, while the apparent increase on American and foreign payments to the Depart-ment, accounts to 16.1-2 per cent. Or, in figures, ment amorans to B 1-2 per cent. Or, in figures, the receipts from American and forcign postages from the fiscal year, executed those of the preceding year \$900,000,255; but excluding the balances accruing to the British Post Office, in order to indicate the increase of our own postages, the amount reaches \$997,610,79. During the last quarter of the fiscal year, a sensible reduction took place in domestic postage, attributable to the near approach of that period to the time fixed by the Act of March 3d. 1850, to establish cheaper rates of postage. A consequent delay in correspondence was a natural result. A similar reduction was observed upon the adoption of the reduced mites under the Act of 1845. The claims of the franking privilege by certain tuenbers of the present Congress also contributed to this reduction.

pre ent rates of letter possage is decreted advisable.

I was recommended in my last annual report the uniform inland rates, without regard to distance, should be established on newspapers and other printed matter. It was immediately urged the the postage recommended would be unequal and unjust, and that a newspaper carried 50 miles not 7, should not be charged with the same postage as one carried 2,500 miles. The force of this objection was felt by this Department and by Congress, and the experiment of numerous rates, gradual sel according to distance, has been tried. From the results of this experiment, I am satisfied that the reshould not be more than two,or at most three

present Congress also contributed to this reduction.

The annual transportation in California, at the close of the fiscal year, was 537,476 miles, at an annual cost of \$130,270.

The annual transportation in Oregon at the close of the last liscal year, was, as near as can be ascertained, 30,198 miles, at an annual cost of \$19,93%, or about 65 cents and 4 mills per mile. The present amound transportation in Oregon was increased under the new contracts, which vent into operation on and after the first day of July last, to 66,960 miles, at an annual cost of \$19,441.

There were, on the 30th day of June host, six foreign mail routes, of the estimated aggregate. n as all according to distance, has been tried. From the results of this experiment, I am satisfied that the reshould not be more than two, or at most three different rates of inland postage on newspapers set to actual and home fide subscribers and that these on periodicals and other printed matter, including transient newspapers, should be reduced to another, and more ucarly assimilated to the invesper rates. It is difficult to assign a sufficient reason for changing upon such periodicals as the reviews, numerous magazines, and theological, and deal, and law journals, more than three times the amount of postage charged for the same distinction and aweight of newspapers. Such periodicals are less ephenogral than the ordinary in wapapers, and certainly not less beneficial in their influence. The same rates of postage, acceding to their weight, would be just and equitable, would simplify the accounts of the Department and relieve it from the peoplexing and otten is influenced in the continuous duty of dissernmenting between different p blications, and declaring one a newspaper and another and a newspaper, in cases where little diffuence can be perceived, and were the changed character of the next number of both might render it proper, in respect to such manhers, to reverse by the decisions.

The rates of postage on all printed matter can be rendered more uniform and less complex by a representative, the results of the rest of such newspapers. There were, on the 39th day of June last, six foreign anal routes, of the estimated aggregate length of 18,349 miles. The number of miles of amount transportation thereon is estimated at 615,296.

Jefferson Democracy.

Just think of the idea of a free trade and direct Just think of the idea of a free trade and direct tax politician, claiming be to a Jefferson democrat! The absunity will the more readily appear when we remember that the war cry of Mr. Jefferson's party was "No direct tax, and, no stampact." That this was in disappearal of the administration of Jin. Adams, when direct taxes were raised for the support of government—that Mr. Jefferson was the author of the introduction of a system of revenuely impost and that this therefore is Jefferson denocacy. These are historical facts and cannot be denied.

We are living in an age of humbings, and this Jefferson Democracy is one of the biggest humbings of the day. Men array the asclves against the labor of the country and fight monthly for the interests of British manufactures a importers, and call themselves Jefferson Democrats, just as some call themselves christians, and give all their strength and influence in favor of the most ungoily systems of oppression that ever disgraced the world.—Elkhorn Star.

The Milwaukee and Messissippi Railroad Company have proposed to the people of Dane county, that the county subscribe for \$150,000 of stock in said road; and in payment for that amount, issue county bombs payable in ten years, drawing interest at 10 per cent. For these lends, the county to receive an equal amount of Railroad stock.

the county to receive an equal amount of Ranroad stock.

This is a matter for the people of Dane county to think about. Will they receive an equivalent for that amount of money? Will the stock be worth \$\frac{4}{3}\$ 50,000 when the road is completed?—Can Dane county make money in the operation? These are the questions for roasideration; and the same might be asked by every individual who is asked to take stock in the Dodgeville and Potes Road. We can't see why the people of this county are not more interested in a Railroad than the people of Dane county. We can empty into Milwaukee more freight than Dane county; and we can lave the trade of all the Northwest and North to send through from Potosi. The present and future immense amount of Northpresent and future immense amount of Northwest and North to send through from Poton. The present and future immense amount of North-western trude and emigration will puss and re-pass on this route. Beffer Testimony than was ever offered in favor of any Medicin .

From Dr. James M. Moore. From 17. James M. Moore.

Dr. John Bull.—I have no basication in seeing, that I believe your Europarille to be the less article ever manufactured for the cure of screenia applillis, and many other retainents and gloudular affections, buting used it with order success in a number of the r long cases.

Ladisville, Dec. 26, 1817.

J. M. MOORE, M. D.

More Testimony from Dr. Moore. Mar's John Bull—I am tobing your Sarspurilla in several new cases of serroful, and with lappy effect. I am now confident it some of the most effections modicines that can be made for that disease. JAMES M. MOORE, M. D. Winchester, Ky., Feb. 1, 1848.

What Dr. Pykos, Physician by appointment to the Loniciale Marine Hospital, says of Hulf's Sarsayarilla.

Linkwille, March 20, 1849

Fhave examined the prescription for the preparation of John Bull's Sarsayarilla, and I believe the combination to be un revealent one, and well calculated to produce an alterative impression on the system. I have used it both in cubic and private practice, and think it the best article of Sarsayarilla in use.
